

Welcome to the latest edition of the newsletter from the Sport & PE Department, we would like to keep you as up to date as possible with the course content and topics students are covering. If you have any questions, please do not hesitate to contact us at College.

Mr A Taylor | Head of Sport & PE | andy.taylor@honiton.college

What are we studying?

Year 10

Since Easter we have been focusing on our coursework. Students have completed a number of fitness tests including the Illinois agility run, speed and muscular endurance test. After this they looked at what the main components of fitness are for their chosen sport (e.g. cardiovascular fitness for long distance runners, power for rugby or agility for netball). They have then created a circuit training session based on this in order to improve their fitness in their given area. This in turn will improve their performance within their sport. After completing these training sessions twice a week for 6 weeks they have redone their fitness tests and are using the data collected to write up their findings and conclusions. Students will also complete their mocks in June and we will spend time in lessons reflecting on and reviewing these.

Questions you could ask at home.....

Your son/daughter should be able to confidently talk to you about these topics:

Year 10

- ◆ Can you name all 9 components of fitness?
- ◆ What are the main components of fitness for your sport?
- ◆ How do you find your maximum heart rate?
- ◆ What are training zones and how did you use them in your circuit training?
- ◆ What is progressive overload?

Revision Flash Cards £8.99

100 Revision Cards

Multiple choice questions and answers

Worked examples
